

Will Bauer Road Become Glen Este Road in the Future?

A comparison of current and future traffic conditions

Glen Este Road/SR 32 Intersection

2006 Peak Hour Traffic • 6,000 vehicles per hour

Crashes (2004-2006) • 130 crashes
• 90% congestion related

Bauer Road/SR 32 Intersection

2030 Peak Hour Traffic • 7,000 vehicles per hour

Crashes • You cannot predict future crashes, but the traffic volume at Bauer Road in the future will be greater than the traffic today at Glen Este. Traffic crashes are likely to follow the same pattern.

Lesson Learned

Repairing the Glen Este intersection will be a complicated and expensive undertaking. The land needed to improve traffic flow is already developed.

It is much better to have a plan up front to deal with the congestion and crashes that will inevitably occur at heavily used signalized intersections.
